

When possible rig a the center of the tarp by tying a rock on the line using the Killick hitch shown here and tossing it over a high branch.

Rigging a Tarp

provides shelter from the wind and rain, here's the knots you'll need

Tie to grommets using a sheet bend

To get the length needed tie lines together with a slipped square knot.

Adjustments are easier when all the lines are tied off with a taut-line hitch.

Leave your lines tied to the tarp and wrap them up in a 'tamale' by wrapping them figure eight style over your outstretched hand as shown.
